The Sci-Fi and Steam Punk Chess Pieces are great to look at.

Good game, it wins, I win, and lots of tutorial to help me play better.

Stable build and no crashes for me.

There might be better multiplayer chess software out there, but when I want to review how those games went, Pure Chess is the go to.

THUMBS UP: GOOD GAME.. You get one track. You cannot do Time Attack or hot lap or Time Trial...whatever it is called. You get your choice of six teams, format is not the same as the one that took place in 2016, nor are all the riders available. The format does not run the same as the actual SMX Riders Cup either. While this track can be fun at times, and it is quite enjoyable lapping riders, it also seems to be very glitchy. Sometimes I think I'm playing Mario Kart with the weird events that will happen. There is a double that forms odd ruts that will flip your rider on landing. There is a turn that the AI often fail to negotiate . This results in you being punted off the track while they continue on. I've been pushed very wide for the holeshot more times than I can count, though that one is just the overall AI's failure to notice you exist at times and exists in all game modes. And, suprinsgly, when riding in MX2, I will have Tim Gasjer all up on me for the entire race, but not MX1, despite my lap times being less than a second apart. And sometimes I will crash out of nowhere, several times mind you, when attempting to pass a rider. I doubt rubberbanding AI, but....completing a perfect season on Realistic with no rewinds and restarts was easier.

Milestone doesn't seem to add much DLC to their MXGP series, and I guess I should be thankful for a track that causes me to swear more than..., I don't know, Gordon Ramsey? But, despite the sometimes fun nature of a pseudo SX track, it's not worth the money or glitches. If you must have it, I'm sure after time it will go down to a sum that is reasonable to part with..... For fun, no big deal, some tactics, hard enough to play.. GG to this game, found no one playing it online. So think no one plays it anymore.. One of the best games I have ever played. Ground textures are looking bit old, but otherwise I think graphics are aged well. First game with fully destructible environment.. At the end of the first level you have finished the game. It has very little to do with the life of the cells, at the same time those chemical reactions concatenate such that they can enrich this type of game much more than what has been done, only useful during brief sessions on the toilet. It is more monotonous than the pharmacological coma. Online you will find free browser games that have a greater depth, like this ridiculous game that in comparison looks like a tier AAA. <http://www.silvergames.com/en/cellcraft>  
Don't waste your money.

Wow a game is freaking old tbh, but it seems to have very well gameplay and actually have a humorous story (not like some time management these days)

I pick this up as sale and it's basically worth 0.5\$ what you want from that amount?. This is the pre-order bonus as DLC. Do not buy it, the weapons aren't worth it. Great base game though.. Good Game

He's good. Awesome game! Depends on what you like. If you're into Farming and want an outstanding simulator then check this game out! Really pleased and amazed by the work.

Ford7000Man 28/1/16. This isn't Trials... Nor is it Far Cry.. It's some sort of weird cross between the two. And my god is that an awesome soundtrack, and the cutscenes are pretty cool as well. As far as the gameplay it seems to have a bunch of strangely composed levels tied together, and of course the bike ones are the best. The whole rotation of vehicles thing is creative, but really the bike is the only one I've had no faults with. Right now Uplay is dead so I can't play much longer, so the only real negative is Uplay.
